

CALL FOR NOMINATIONS:

The CRC Award for Computational Sciences and Visualization

Nominations Due

March 14, 2008

Description of the Award

This award recognizes outstanding contributions in the areas of computational sciences and visualization. Such contributions may include, but are not limited to: 1) applications of high performance computation and/or visualization technology; 2) development of algorithms, codes, software environments or other tools for better using high performance computing and/or visualization. The nominated work need not have been done using CRC hardware or software. Up to three awards may be presented. Awardees will receive a \$1,000 cash award and a plaque.

Eligibility Criteria

This award is open to all current students seeking an advanced degree, as well as to recent graduates (August 2007 and January 2008) from advanced degree programs. Students who have won the award previously are not eligible.

Nomination Procedure

Award nominations should be accompanied by 1) the student's curriculum vitae; 2) a one-page abstract summarizing the nominated work; 3) a letter from the student's graduate adviser explaining the significance of the work, and 4) the URL of a Web page at which additional details or supplementary information concerning the work is presented. Nominations will be judged on the quality and impact of the student's work and not on any aspects of the design of the requested Web page.

Please also provide the following information:

- The nominee's mailing (and e-mail) address and phone number;
- The nominator's name, e-mail address and phone number;
- Refereed and non-refereed publications should be clearly identified in the curricula vitae. Please do not include copies of publications (these may be posted on the requested web page).

All nomination materials must be received by Mary Hendriksen in the Graduate School (416A Main Building) by Friday, March 14, 2008.
