

"I thoroughly enjoyed my time at the University of Notre Dame this summer. I have truly grown from this experience and know I am ready to handle the challenges at the next level. To be honest, I returned to Miami feeling more like a graduate student than a graduating senior."

–Claire Scott-Bacon

University of Notre Dame PhD student
Florida International University, Class of 2016

"I honestly couldn't have asked for a better program to be a part of. I feel like I grew so much professionally and academically, not to mention that I made some new friends, some of which I may end up being friends with for the long run. It's been quite the experience academically, as well as socially."

–Roy Brooks

Polytechnic University of Puerto Rico
Class of 2017

"The SROP program was a wide window of opportunities for students who come from lower ranked universities or public colleges that don't get enough funding for their labs. Activities such as visiting Chicago, walks around the lake, and eating downtown were things that we got to do as a group. I am happy to see that more minorities and women are pursuing careers in the STEM fields, and are encouraged into dreaming bigger, thanks to programs like this."

–Paola Rivera González

University of Puerto Rico Mayagüez

Research with world- class faculty

The Graduate School's Summer Research Opportunities Program prepares students for graduate school success. We encourage current undergraduate juniors and rising seniors, in any discipline offered by the Notre Dame Graduate School, to join our campus community for 10 weeks of guided research with world-class faculty, culminating in a symposium attended by 200 peer researchers.

We offer:

- Competitive stipends
- Housing
- Transportation
- GRE preparation
- Notre Dame Graduate School application support
- Fee waiver when applying to ND
- Assistance with fellowship applications to NSF, NIH, and more

To apply, please visit:
graduateschool.nd.edu

Apply by: **March 15**
Start: **Late May**

This is a summer program and
will run through late July.

If you have any questions,
please contact Graduate Admissions
at 574-631-7706.

Other undergraduate research
opportunities can be found at:
